

The transformation from a small company to a leader in the medical supply industry was a process that allowed us to create a comprehensive offer and solutions to support our customers. Currently, ZARYS employs over 400 people and serves several thousand customers from various sectors.

company logistics

The ZARYS logistics centre is the largest warehouse of disposable medical equipment in Central Europe and provides fast and reliable access to a wide range of disposable medical equipment.

It is located in Zabrze, part of the Katowice Special Economic Zone. The high-bay warehouse covers an area of 30 000 m² and offers 30 000 pallet spaces.

logistic centre

Thanks to its large warehouse capacity and advanced storage systems, ZARYS is able to efficiently handle large orders and ensure continuity of deliveries.

easyCARE

easyCARE diagnostic gloves gain the trust of professionals in the medical industry, and more, since 2015. Made of the highest quality nitrile, latex and vinyl, they are the answer to the growing demand for exceptionally durable and comfortable protective gloves. The easyCARE brand gained popularity due to its reliability and wide range of applications.

Each type of easyCARE glove has been carefully designed to provide maximum comfort and protection.

All the gloves we offer are Cat III personal protective equipment according to PPE Regulation (EU) 2016/425.

nitrile gloves

Made of synthetic acrylonitrile-butadiene rubber (NBR), they are characterized by high mechanical strength (also puncture resistance), chemical and biological resistance (they are a barrier to viruses and bacteria) and flexibility, thanks to which they fit the hand, providing the user with comfort at work.

easyCARE^{nitrile} long nitrile gloves

Providing optimal protection

Anti-wrinkle effect proven in clinical studies*

*The mediCARE nitrile Hydra+ glove demonstrates superior anti-wrinkle performance compared to a traditional nitrile glove with visible wrinkle reduction after just one day of use, with gradual improvement until the end of the study.

Almond oil

regenerates, moisturizes, slows down the skin aging process, smoothes, firms, helps remove dead cells, brightens the skin, soothes irritations and accelerates the healing of skin lesions, strengthens the skin's hydro-lipid coat

Vitamin E

natural antioxidant, vitamin of youth - fights free radicals and prevents wrinkles, provides long-lasting hydration

Glycerine

moisturizes, improves the appearance of the skin, smoothes, soothes irritations

PLASTiplast

fabric mounting adhesive

Made of **cotton fabric**

- Wound onto a roll / spool*
- Coated with acrylic adhesive
- Finished with serrated edges
- Permeable to air and water vapor
- Thin, flexible, adapts to the shape of the body
- Hypoallergenic
- Possibility to divide the adhesive lengthwise and widthwise, also without the use of scissors
- Non-sterile product

elastoKIDS STERIL

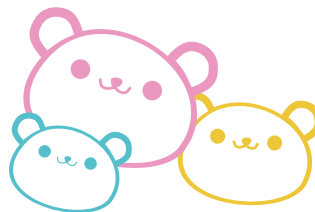

dressings with non-woven absorbent insert

Made of **non-woven fabric with micropores in the structure** ensuring an appropriate vapor permeability coefficient

- Self-adhesive part made of hydrophobic non-woven fabric
- Hypoallergenic
- Flexible, adapts to the shape of the body
- Easy to attach to the skin
- With rounded edges that prevent accidental peeling off of the dressing
- Covered on the entire surface with hypoallergenic acrylic glue without zinc oxide, rubber, latex
- Having a protective layer of siliconized paper facilitating precise, painless and effective application
- Absorbent insert, placed centrally, absorbing moderate exudate from the wound, coated with a polyethylene mesh that prevents the insert from sticking to the wound and facilitates removal of the dressing
- Sterile product

SAFE+

protective suit

Personal protective equipment

The BETAsafe suit is a **protective measure individual** category III according to with Regulation (EU) 2016/425 of the European Parliament and of the Council

The highest protection

Protects against **chemical agents**
and **infectious** types 4b - 5b - 6b

Ensuring safety

The third category includes products of complex design intended to **protect health or life** against hazards that may cause death or irreversible damage to health.

BETA safe

How to put it on

1

Make sure the size is right for the user.

2

Check that the product has no defects and is in good condition (no holes, loose parts, etc.).

3

Open the zipper and put on your outfit, being careful not to tear the material. Close the zipper and fasten the flap. Place the adhesive strip attached to the suit without folding it.

4

Cover exposed parts of the body (hands, respiratory tract, feet) by putting on protective gloves, footwear, possibly a mask, etc. and securing them to the suit (using adhesive tape if necessary).

BETA safe

standards

The suit is a category III personal protective equipment in accordance with Regulation (EU) 2016/425 of the European Parliament and of the Council EN ISO 13688:2013 Protective clothing. General requirements

EN 14605:2005
+A1:2009

EN 14605:2005+A1:2009 Protective clothing against liquid chemicals - Performance requirements for protective clothing covering the whole body with liquid-tight connections in liquid (Type 3) or spray (Type 4) form, including with products providing only partial body protection (Types PB[3] and PB[4])

EN ISO 13982-1:2004
+A1:2010

EN ISO 13982-1:2004+A1:2010 Protective clothing against solid particulates - Part 1: Performance requirements for clothing providing protection to the full body against airborne solid particulate chemicals

EN 13034:2005
+ A1:2009

EN 13034:2005+A1:2009 Protective clothing against liquid chemicals. Performance requirements for clothing providing limited protective performance against liquid chemicals (Type 6 and Type PB[6] clothing)

EN 1073-2:2002

EN 1073-2:2002 Protective clothing against radioactive contamination - Part 2: Requirements and test methods for non-ventilated protective clothing against particulate radioactive contamination

EN 14126:2003
+ AC:2004

EN 14126:2003 + AC:2004 Protective clothing. Requirements and test methods for protective clothing against infective agents

Class 6 Resistance to penetration of contaminated liquids under the influence of hydrostatic pressure
Class 6 Resistance to penetration of infectious agents as a result of mechanical contact with substances containing contaminated fluids
Class 3 Resistance to penetration of contaminated liquid aerosols
Class 3 Resistance to penetration of contaminated particulate matter

EN 1149-5:2018

EN 1149-5:2018 Protective clothing. Electrostatic properties Part 5: Material and construction requirements

EN 14325:2004 Protective clothing against chemicals. Methods of test and classification of materials, seams, permanent and detachable joints used in protective clothing against chemicals

Personal protective equipment (PPE) are products that protect against one or more hazards that may affect the **safety or health of the user.**

thermCARE

thermal emergency blanket KR160210

Made of **metallic PET foil** with aluminum coating

- Protects the body from cooling down or excessive overheating
- The silver side protects the injured person from losing heat and cooling the body
- The gold side protects the injured person from overheating
- Resistant to damage
- Size 160 x 210 cm
- Non-sterile product

 **commercial packaging**
1 pc.

 **transport packaging**
20 x 12 pcs

thermPAD

cold/hot gel compresses

Made of **non-toxic, durable foil** with a gel insert

- Stores and returns accumulated heat or cold for a long time
- Remains flexible after freezing, which allows for easy modeling to the body area
- Comes with a fabric cover to prevent external damage
- Non-sterile product

vitahealth

electronic thermometer DMT-437

Fast, safe temperature readings

- Waterproof
- Measurement time: 10 seconds
- Range: 32.0°C - 42.9°C (90.0°F - 109.9°F)
- Accuracy: ± 0.1°C (± 0.2°F)
- Soft, flexible measuring tip
- Audible signal
- Automatic shut-off
- Last measurement memory
- Low battery indicator
- Battery life: ~200 hours
- Size 123 x 19 x 11 mm

 **commercial packaging**
1 pc.

12 pcs

transport
packaging
20 x 12 pcs

plastic tweezers A-02

Made of hard ABS

- Anatomical straight tweezers
- Anti-slip grip surface ensures safe use
- Gripping part finished with transverse stripes enabling a firm grip
- Size 130 mm
- Sterile product

commercial
packaging
100 pcs

transport
packaging
10 x 100 pcs

entrance mat M001

Made of low density polyethylene (LDPE)

- Good adhesive properties, thanks to the use of acrylic glue
- 30 numbered, adhesive sheets with a thickness of approx. 45 µm
- Low profile mat: total thickness of approx. 2 mm
- Self-adhesive backing prevents unwanted movement of the mat
- No need to clean the mat - when the mat surface is full of dirt, tear it off to reveal a new, clean one
- Size 45 x 115 cm
- Non-sterile product

commercial
packaging
10 pcs

transport
packaging
5 x 10 pcs

vomit bag WW-01

Made of durable, transparent blue LDPE foil

- Wide bag inlet secured with a polypropylene collar
- Circular collar rim provides a firm grip and facilitates bag maneuvering, reducing the risk of contamination with the contents
- Collar equipped with a special cut that allows the bag to be closed and hygienic disposal of vomit content
- The direction of reading the scale for small volumes is marked with an arrowhead
- Pictorial instructions for use printed directly on the bag
- Capacity 2000 ml
- Non-sterile product

commercial
packaging
20 pcs

transport
packaging
30 x 20 pcs

M2 Mouthpiece for Mouth-to-Mouth Resuscitation M2

The mouthpiece has **an ergonomic shape** that makes it easy to use

- The mechanical non-return valve protects the rescuer from contact with the victim's secretions
- Non-sterile product

commercial
packaging
50 pcs

transport
packaging
1200 pcs

surgical blades

Made of **carbon steel**

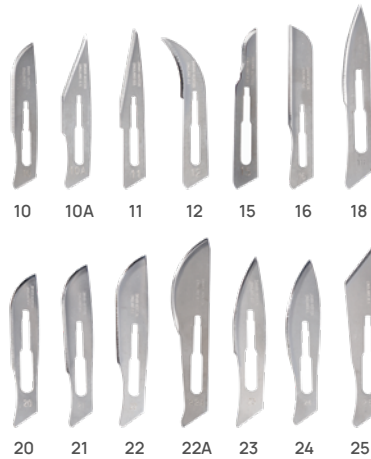

- Blade sizes 10 to 16 compatible with #3 shank
- Blade sizes 18 to 25 compatible with #4 shank
- Size marking on the blade
- Sterile product

commercial
packaging
100 pcs

transport
packaging
