MAIN FEATURES OF THE GLOVES

Gripzzly gloves are a guarantee of safety and work comfort. They are recommended for people working in many industries such as chemical, pharmaceutical, or automotive, exposed to contact with chemical substances. They are also suitable for home use or hobbies that require a high level of protection.

Gripzzly are suitable for anyone who values maximum protection and comfort of use, even in the most demanding working conditions and while pursuing their own passions.

**Safe for contact
with food.**

**Hand protection against dirt
and chemical substances.**

with food**

DISCOVER GRIPZZLY

Gripzzly gloves were created with the aim of **providing maximum safety** for both professionals and enthusiasts working in tough and demanding conditions. Made from **high-quality nitrile**, they are characterised by **exceptional durability and above-average thickness**.

They provide a high level of protection – featuring **increased resistance to tears, abrasions, and the effects of oils, greases, and chemicals**, which significantly increases safety when working with hazardous materials.

GRRRRIZZLY POWER

The gloves protect against fungi, bacteria, and viruses, are free from latex and thiurams, **safe for contact with food**, and meet strict safety standards. There are two models available: Gripzzly and Gripzzly X.

Personal Protective Equipment category III (type B) in accordance with Regulation (EU) 2016/425 of the EP and Council
